

Power your game.

Exosuit is redefining the way we think of sportswear, combining active compression & integrated support in garments that interact with the body to stabilise, and improve performance. Our patented technology enables people to push their limits or overcome injury whatever their sport of choice.

OUR STORY

The Exosuit journey began in 2012 in a London physio room. Following countless injuries, frustrations, and metres of kinesiology tape, we decided there had to be a better way to support our bodies during exercise. Since then we've developed synergy between human and clothing, through garments that interact with the body to support, stabilise, and power your game.

PRODUCT BENEFITS

Exosuit garments provide a number of benefits for sports performance, support, and injuries:

MUSCLE & JOINT SUPPORT

Our patented PowerFlex Technology supports key muscles and joints. Perfect if you're protecting an injury, require support during rehab, or just want to perform better for longer.

DYNAMIC POSTURE

By applying active support across the upper back and shoulders, Exosuit garments work to improve dynamic posture during exercise, improving your comfort and performance.

ENHANCED PROPRIOCEPTION

Exosuit garments interact with your body by gently gripping your skin at anatomical sites. This engages the brain and boosts awareness of muscular activation & joint orientation.

FEEL POWERFUL

The unique support structure and cut of our garments works with your body, giving you a feeling of increased strength and power. Feel like a superhero and power your game.

WHO SHOULD WEAR EXOSUIT?

Exosuit garments provide functionality across a number of sports and activities, primarily focussed around upper body support and power. Exosuit can help athletes:

- Seeking a boost in performance - Exosuit can help you push harder for longer.
- Requiring additional support around specific joints & muscles - due to injury or instability.
- Needing postural support - whether in a sports or active lifestyle environment.

INDEPENDENTLY TESTED

Here at Exosuit we don't take our claims lightly, so we had our garments tested independently. In paired comparison tests with 9 cricketers and 11 baseball players, here's how the athletes felt:

INCREASED
POWER

GREATER
SUPPORT

ENHANCED
POSTURE

ATHLETE TESTIMONIALS:

"The EXO1 makes me feel powerful, and gives me the confidence to bowl fast every time."

Aaron Beard, Essex Cricket

"From the minute I put on my Exosuit I could feel the impact on my posture.."

Will Lintern, GB Baseball
